## Implantation titanium implants

60 minutes

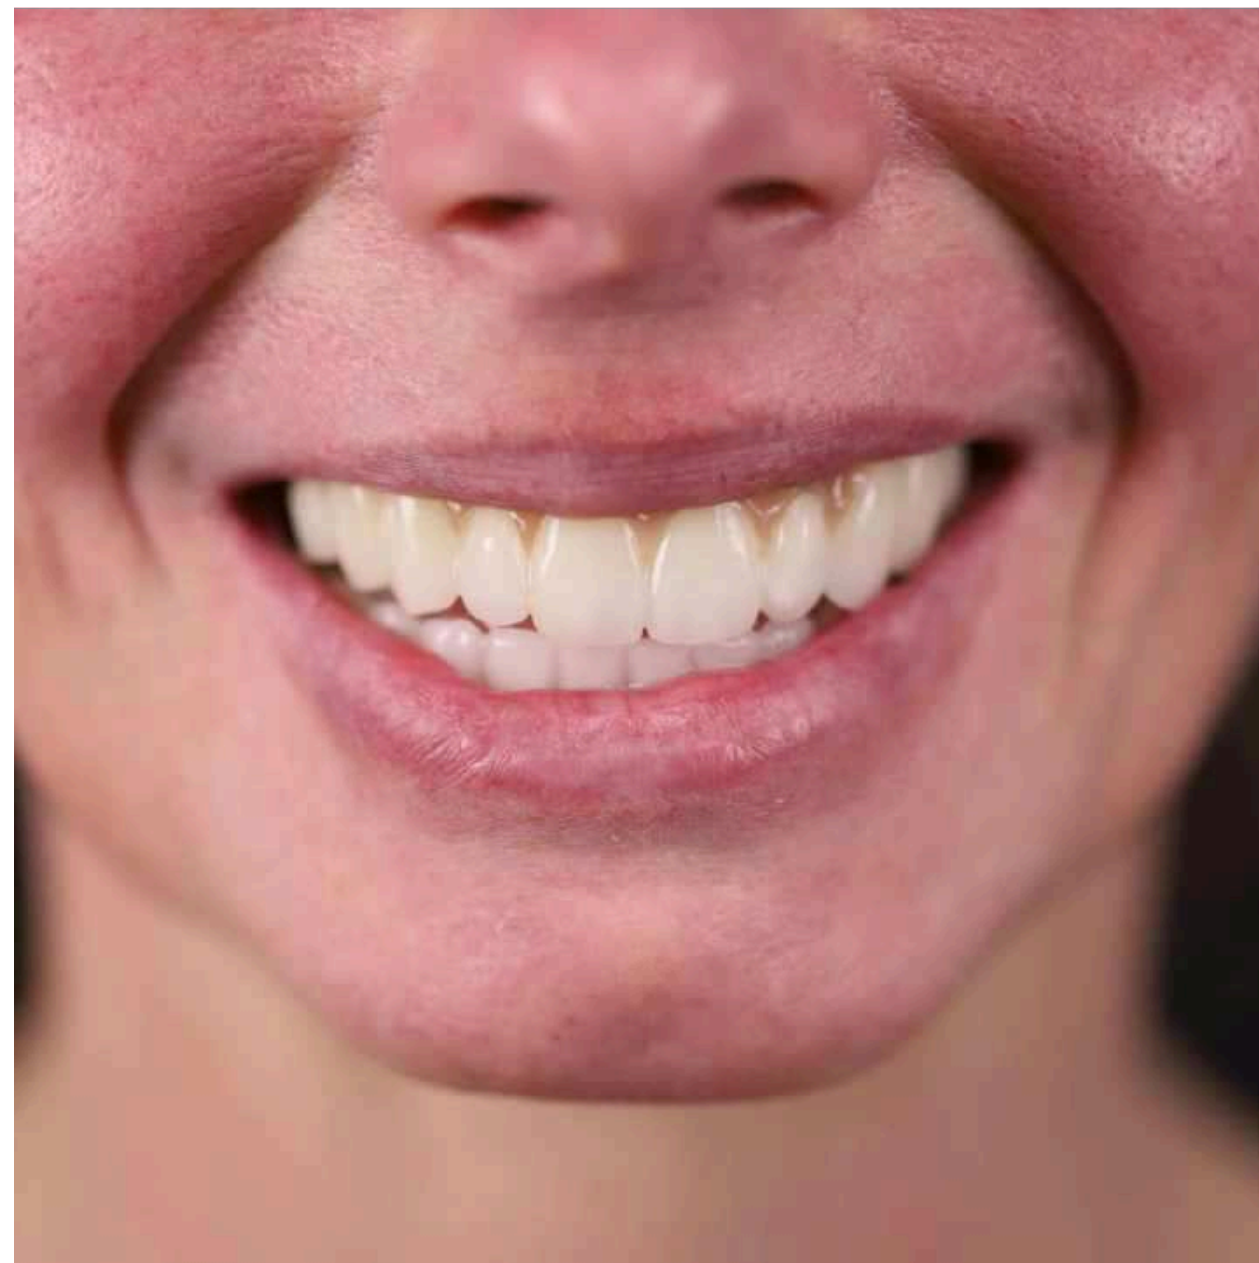

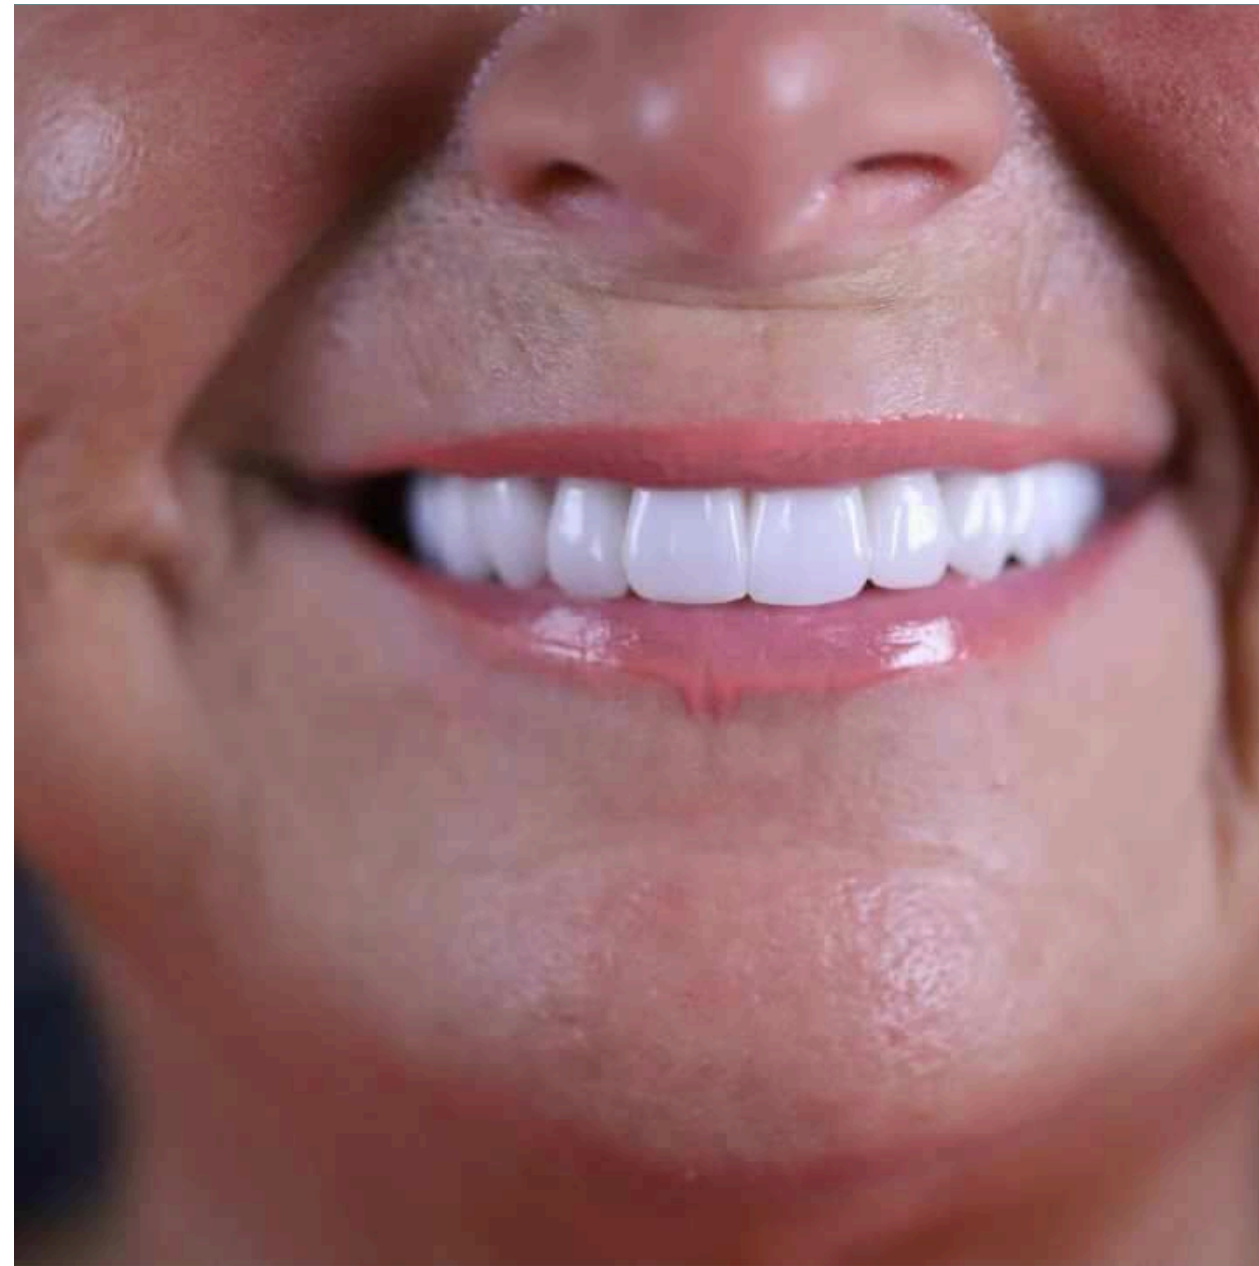

2 200 EUR

PRICE OF IMPLANT WITH CROWN

- 01 The clinic uses implants of only well-known brands
- 02 Due to surgical templates the implant is installed in the right position
- 03 During the implantation we carry out gingivoplastics around the implant, protecting it thus against the infection
- 04 We carry out the implantation without cuts

## Implant prosthetics

from 180 minutes

820 EUR

- 01 Crowns on implants are made only from **biocompatible materials**, ceramics and zirconium oxide
- 02 All constructions are made with a screw fixation
- 03 CAD / CAM technology ensures high precision of making and installation of the construction
- 04 In most cases, an intraoral scanner is used instead of impressions with impression material
- 05 We have our own laboratory, so all forms and designs are made within a short period of time

Crown on the implant in the lateral section **820 EUR**

Crown on the implant in the frontal section **1 020 EUR**

Bridge on 2 implants for 3 units in the lateral section **2 440 EUR**

Bridge on 2 implants for 3 units in the frontal section **3 050 EUR**

# All on X

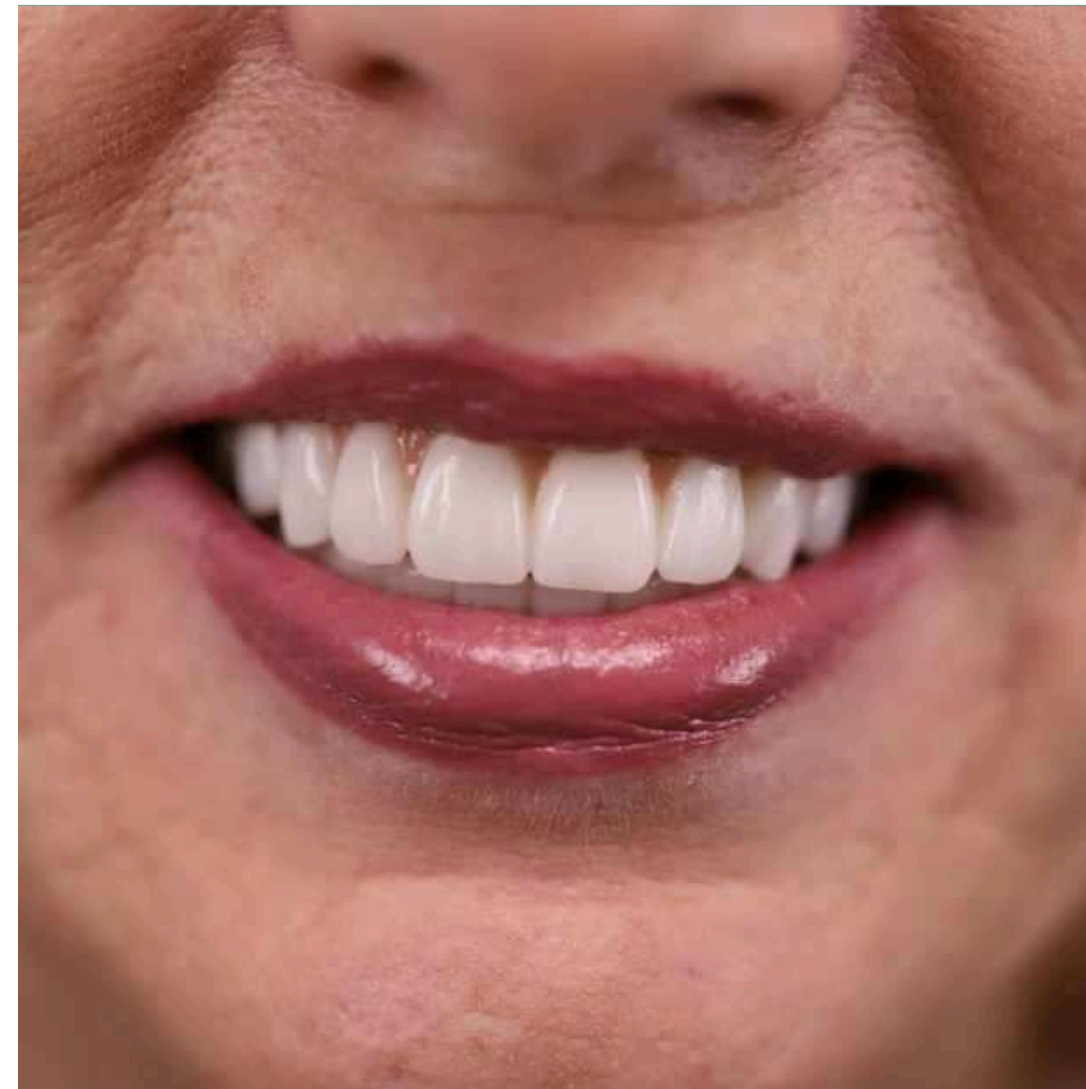

3 visits

12 150 EUR

CashBack 790 EUR  
Partner YouTube

- 01 All on 4 implantation system allows you to bring back a healthy smile in just 3 visits
- 02 It is carried out in cases when it is impossible to restore teeth or in toothless patients.
- 03 From 4 to 8 implants are installed on the upper or lower jaw
- 04 You get new teeth on the day of implant installation
- 05 The implants are installed according to a **special template** and the teeth on the implants are made before implantation.
- 06 You do not need to wait for healing after tooth extraction - the implants are installed immediately after the extraction. This technique allows to avoid bone plastic
- 07 All the procedures are carried out by the surgeons with **more than 10 years of experience** Our patients' age differs between 30 and 85 years

# Complete teeth restoration

from 3 visits

price after the consultation

- 01 Quality treatment and teeth restoration under the microscope
- 02 Ceramic and zirconia crowns
- 03 Choice of color from the whitest to natural shades
- 04 Digital manufacturing protocol allows restoration of upper and lower teeth in just 3 visits
- 05 We can carry out all manipulations in sedation - you sleep, we work

# Analgesic sedation

Treatment / Prosthetics / Implantation / Extraction

from 2 hours

165 EUR / 1 hour

You sleep  
we work

The following procedures are performed in sedation:

- 01 Treatment - complete restoration of all teeth in 1 - 2 visits
- 02 Implantation - both when installing single implants and when restoring dentition on implants **ALL on 4**
- 03 Wisdom tooth extraction
- 04 Prosthetics - the use of digital technology allows manufacturing and fixing **Crowns / veneers / ceramic fillings while you sleep**

Benefits of analgesic treatment:

- 01 All manipulations are painless and presumably better recovery after major surgery interventions
- 02 An opportunity to restore all teeth in just 1-2 visits Sedation is provided by a team of experienced anesthetists

## Bone augmentation

from 2 hours

from 550 EUR

- 01 Our clinic carries out all the sinus lifting techniques: open sinus lifting, closed sinus lifting and piezo-intralifting
- 02 We carry out bone augmentation in height and width  
Horizontal and vertical augmentation
- 03 Bone plastics methodics with minimal surgical interventions allow our patients to avoid swelling and other unpleasant sensations
- 04 For plastics, bone powder is used.  
and membranes from the most reliable companies **Geistlich** and **Botiss**
- 05 All the procedures are carried out by the surgeons  
with more than **10 years of experience**

## Gingivoplastics

from 60 minutes

from 620 EUR

Soft tissue repair is performed both **around implants and around the teeth.**

Gingivoplastics helps to:

- 01 Cover the exposed and sensitive dental cervixes
- 02 Cover the wedge-shaped defects of the dental cervixes
- 03 Provides **reliable protection** of the implant from food and infection
- 04 Helps improve **tooth aesthetics** in the smile area

Gingivoplastics is always performed with **magnifying optics.**

## Professional oral hygiene

30-40 minutes

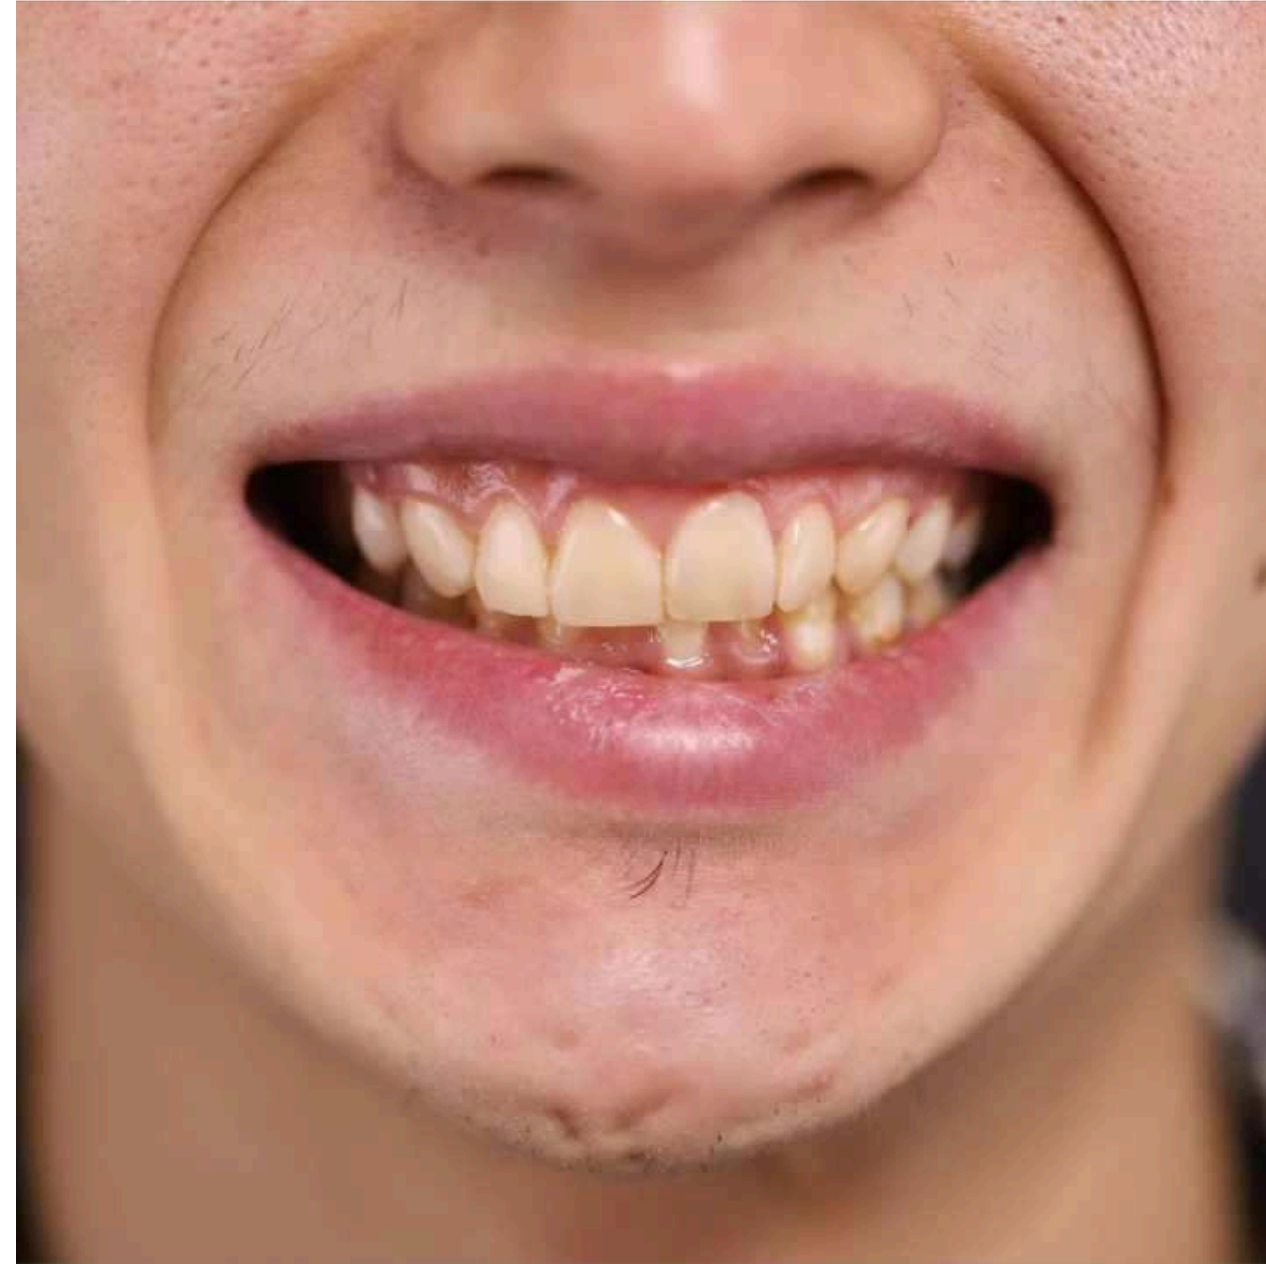

170 EUR

### Stages of Dental Hygiene

- 01 Ultrasonic cleaning**  
- removes hard dental deposits - "tartar"
- 02 Air-Flow cleaning and polishing**  
- removes pigmentation and soft dental deposits
- 03 Polishing teeth with silicone nozzles, brushes, paste**  
- makes tooth surface smooth, prevents plaque formation
- 04 Application of gel for fluoridation and sensitivity reduction**  
- maximally reduces the sensitivity of teeth to temperature stimuli "cold and hot" and closes microcracks

With proper dental care, dental hygiene is necessary twice a year.

## Tooth restoration with a composite: caries treatment

60-120 minutes

230- 520 EUR

- 01** Caries treatment is carried out **only under a microscope**  
- allows to eliminate caries with maximum preservation of tooth tissues - control of the distribution of the composite, control of grinding and polishing - allows you to keep teeth with deep caries alive
- 02** For restoration premium - **gradematerials** are used
- 03** Tooth restoration is carried out under **insulating film (cofferdam)** and a **microscope** to ensure the cleanliness of the working field.
- 04** Quality restoration allows to preserve the tooth "alive" even in case of deep defects

## Endodontics root canals treatment

60-90 minutes  
2-3 visits

580- 1 470 EUR

- 01 3D X-Ray is carried out for diagnostic
- 02 Dental microscope is used during the root canals treatment
- 03 The root canals are treated by **sterile instruments**
- 04 Chemical treatment is enhanced by **ultrasonic activator**
- 05 Only **biocompatible materials** , such as calcium hydroxide, bioceramics, gutta-percha
- 06 The mouths of the canals are **hermetically sealed with composite** on the day of filling preventing the penetration of infection
